Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Amendment

1. Applicant's response letter received on 08/19/02 has been reviewed and considered with the following results:

As to the rejections to the claims, under 35 U.S.C. 112, 2nd paragraph, applicant's amendments have overcome the rejections, as such, the rejections have been withdrawn.

The prior art rejections to the claims made in the previous Office Action are now withdrawn in view of applicant's amendments. However, applicant's amendments necessitate new ground of rejection as set forth below.

Drawings

2. The proposed drawing correction filed on 08/19/02 has been disapproved because it is not in the form of a pen-and-ink sketch showing changes in red ink or with the changes otherwise highlighted. See MPEP § 608.02(v).

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in-

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or

Art Unit: 2816

(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

4. Claims 1-4, 13, 14, 16, 21, 57, and 69 are rejected under 35 U.S.C. 102(e) as being anticipated by Chan et al. (US 6,191,665).

With regard to claim 1, Chan et al. discloses in Fig.2 an electronic isolator (22) between a source stage (20) and a load stage (24), including at least one circuit path into which electrical noise is directed away from the source and the load stages, including configuring means for configuring the path to appear as an infinite impedance to the output signal from the source stage (see column 3).

With regard to claims 2-4 and 69, the reference also meets the recited limitations in these claims.

With regard to claim 13, Chan et al. discloses in Fig.2 an electronic isolator (22) between a source stage (20) and a load stage (24), comprising an electrical input (48) comprising at least one source electrical connection connected to the source stage, an electrical output (50) comprising at least one load electrical connection to the load stage, at least one circuit path (38, 40) into which electrical noise is directed away from the source and load electrical connections, in which insertion loss of the electronic isolator is inherently dependent upon the direction of signal and noise transmission through the electronic isolator.

With regard to claims 14, 16, 21, and 57, the reference also meets the recited limitations in these claims.

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hai L. Nguyen whose telephone number is 703-306-9178. The examiner can normally be reached on Monday-Thursday.
